Project Title: Richard Scarry Website

I would like to build out a multi page website about Richard Scarry's life and books, and create a sort of catalog of his work and process. The site will be responsive and have a navigation bar at the top. It will have a light hearted vibe with lots of his illustrations populating the site in fun ways.

- Home Page/Introduction
    - Introduce his works and a bit about his career, focusing on being fun and illustration heavy
- Career
    - About his work life and process
- About
    - Early life, education, and family
- Library
    - Bibliography of his work
    - Potentially an interactive stack of books in some way
- Sources
    - Links to the wikipedia article, and other sources used to make the site, maybe links to places to buy his books or view more of his work if there is an online archive
